

Manikanta Tanniru

Full Stack Developer

San Jose, CA | 408-650-2162 | tannirumanikanta1996@gmail.com | [LinkedIn](#)

SUMMARY

Experienced **Full Stack Software Developer** with 5+ years expertise in building scalable, distributed web applications. Proficient in **Java, Python, Spring, springboot, Hibernate, Microservices, RESTful APIs, React, Node.js, SQL/NoSQL, Agile, DevOps**, and **AWS**. Skilled in optimizing workflows and system performance. Committed to continuous learning and adopting emerging technologies while adhering to key design principles.

SKILLS

Programming Languages: Java, python, C++, PL/SQL, Javascript, Typescript.

Frameworks: Spring MVC, Spring, Hibernate, Spring Boot, Spring Security, Spring Data JPA, Node.js, React.js, Angular JS

J2EE Technologies: Servlets, JSP, JDBC, JUnit, JAXB, JMS, JSTL, Multi-threading, EJB, JavaBeans, JSF, JSTL, Multithreading

Web Technologies: HTML5, CSS3, JavaScript, RESTful APIs, GraphQL, TypeScript, jQuery, Ajax, XML, JSON, Bootstrap

Cloud Platforms & DevOps: Docker, Kubernetes, Jenkins, Bamboo, Ansible, AWS, Azure, Google Cloud Platform (GCP)

Databases: Oracle, MySQL, SQL Server, DB2, PostgreSQL, MongoDB, Cassandra, Cosmos DB, DynamoDB

Testing and Logging Tools: Junit, Mockito, Selenium, TestNG, Power Mock, JMeter, Jest, Enzyme, Cucumber, Log4J

EXPERIENCE

Amazon, Sunnyvale, CA | SDE

Feb 2025 - Current

- Involved in various phases of Software Development Life Cycle (**SDLC**) as requirement gathering, modelling, analysis, **architecture design & development** and the project was developed using **Agile Methodologies**.
- Worked on **Hummingbird**, an event-driven integration platform enabling real-time data exchange across Amazon Robotics systems and external partners.
- Designed and implemented workflow-based integrations between systems like Oracle EBS, Kinaxis, PLM, SAP, and Proplanner.
- Built AWS-based orchestration pipelines using Step Functions, EventBridge, Lambda, and SQS for scalable and asynchronous processing.
- Contributed to self-service workflow onboarding, reducing onboarding time significantly. Supported high-scale system handling 100K+ requests/sec and 300+ API routes per tenant.
- Worked on the end-to-end architecture and implementation of Project **Horus**, an automated testing platform for **Amazon Robotics**, enabling business process workflow automation and reducing manual testing effort by over **3000 hours annually**.
- Built a centralized platform using **ReactJS, AWS Lambda, ECS Fargate**, and Step Functions to onboard test suites, manage test cases, and execute workflow validations, improving release confidence and time-to-market.
- Achieved 93% cost reduction in testing infrastructure by using cloud-based worker fleets and auto-scaling mechanisms, Worked on various AWS Services such as **DynamoDB, EC2, S3, RDS, Lambda, Route53, and CloudFormation**.
- Worked on the end-to-end architecture and implementation of Project **Mockingbird** User Portal & Self-Service- Internal Access Management Platform
- Designed and helped implement a new user-facing portal on top of the existing Mockingbird access automation service, giving **Amazon Robotics** users a single place to view their teams, app access, and status instead of relying on scattered wiki pages.
- Optimized backend flows between the Self-Service Lambda, Connector Lambdas, DeprovisionService, and TransactionDB/DeprovisionDb, adding pagination, API rate limiting, and CloudWatch.

DarioHealth, USA | Full Stack Developer

June 2023 – Feb 2025

- Involved in various phases of Software Development Life Cycle (**SDLC**) as requirement gathering, modelling, analysis, architecture design & development and the project was developed using **Agile Methodologies**.
- Delivered dynamic front-end applications using **ReactJS** and **TypeScript**, achieving a **30% improvement in responsiveness**, enhancing user satisfaction.
- Designed and developed interactive **dashboards and data visualizations** using **Chart.js, D3.js, and Highcharts**, empowering stakeholders with actionable insights.
- Delivered seamless data integrations by implementing **RESTful APIs** and **GraphQL**, enhancing data fetching efficiency and reducing response times by **35%**.

Veritas Software, India | Software developer

June 2019 - July 2021

- Developed backend functionality for web applications using **Python frameworks** like Django and Flask, implementing **RESTful APIs**, authentication, and database integration, increasing system reliability by **20%**.
- Designed and implemented scalable applications using **Spring MVC, Spring Core**, and **Hibernate**, improving system performance by **40%** through optimized database interactions.

EDUCATION

Master of Science in Software Engineering | SJSU, San Jose, CA

May 2023

Bachelor of Engineering in Computer Science and Engineering | K L University, Mangalagiri, Andhra Pradesh

May 2019
